Chairman's statement

Dear Shareholders

During the first six months of the year the net asset value of Alpine (NAV) has increased by 10.1% from CHF 12.53 to CHF 13.79. In the corresponding period the share price increased by 8.8% from CHF 12.50 to CHF 13.60.

The positive performance, which is contrary to the market development in the first six months of 2010, was the result of a strong performance of Schaffner Holding, Absolute Invest and Absolute Private Equity.

The annual general meeting of 29 April 2010 approved the continuation of the share buyback program until the next general meeting. Under this program up to 10% of the shares of the Company can be acquired. As of 30 June 2010 the Company had purchased 590'732 shares representing 4.45% of its outstanding share capital.

The convertible bonds of Schaffner Holding and HBM Bioventures were repaid in January and April 2010 respectively. The proceeds were used to increase our position in Absolute Invest. At the end of the reporting period the liquidity represented 11.7% of the NAV (31.12.2009: 13.6%).

The first six months have shown that the portfolio of Alpine Select has a solid resistance to recent market volatility. This is the result of the consequent implementation of the Company's strategy. We remain convinced that the valuation gaps of our key investments will further shrink thereby creating value for our shareholders.

On behalf of the Board of Directors I thank you for your continued interest and trust.

Daniel J. Sauter
Chairman of the Board of Directors

2.3. Financial assets and financial liabilities at fair value through profit or loss

Financial assets at fair value through profit or loss may comprise equity investments, bonds, collective investment schemes, futures, options, warrants, swaps as well as currency forward contracts. Financial liabilities at fair value through profit or loss mainly include futures and options sold short as well as currency forward contracts. For the positions at the end of the reporting period we refer to the investment table under Note 4.

Financial assets and financial liabilities at fair value through profit or loss are initially recorded at their fair value (corresponding to their cost) and are subsequently measured at their fair value. Transactions are recognized on the trade date.

The fair value of investments that are traded in an organized financial market is determined by reference to quoted market prices at the close of business on the statement of financial position date. In estimating the fair value of securities for which no market quotation is available, the Group considers all appropriate and applicable factors relevant to their value, including but not limited to the following: net asset value, results of operations, multiples and discounted cash flow analysis, comparable transactions. The fair values so determined may differ from the values that are actually realized upon the sale of the investments.

All realized and unrealized gains and losses including foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognized in profit or loss. The realized and unrealized gains and losses are calculated based on the weighted average cost formula.
